Description

Corally is proud to present their high-performance 1/10 scale World GT pan chassis, the SSX-10. The Corally engineering team started from scratch and questioned every detail from the ground-up. The SSX-10 features nicely machined first class carbon fiber, precision machined aluminum parts, and high strength composite plastic parts.

The Corally design team focused on the front-end adjustability, easy to adjust rear-end, and the overall flex dynamics of the car. They also made the car easy to understand and to adjust by cutting down unnecessary adjustment possibilities, allowing drivers to get on the track faster with the right settings.

Features:

- Precision cut 2.5mm carbon fiber chassis
- Adjustable front ride height
- Adjustable front camber - caster

- 7075 alloy front upper arm holder
- High strength composite plastics
- Easy to adjust rear ride height
- Torsion free 1-piece rear axle holder
- Precision grinded graphite rear axle
- Super smooth ball differential
- 7075 alloy rear wheel carriers
- Delrin CNC machined main gear
- 7075 alloy motor pod
- Front bumper - chassis protector

Shown assembled with additional equipment (not included) for display purposes only.
