Description The last few years have seen a growing interest by racers to have a simpler car which has almost the same performance as the more complex 1/8 on-road suspension cars. With this in mind, Team Corally engineers have developed the SSX-8. The car is designed around simplicity, easy to understand adjustability, reliable 4-wheel drive technology, and high track performance. When powered with a 4-pole 1/8 brushless motor, appropriate ESC, and 2 x 2S or 1 x4S LiPo power, the car's lap times are close to these of the way more complicated suspension cars. Spend your time driving, not on mechanics....

Features:

- 3.0mm carbon fiber chassis
- 2.5mm carbon fiber front arms and radio plate
- 2.0mm carbon fiber body plates
- Adjustable "Ball Type" front steering
- Adjustable front camber and caster
- High strength composite plastic parts
- 7075 T6 Alloy bulkheads - front & rear

- 6065 T6 Alloy wheel spacers - rear
- 6065 T6 Alloy body posts, battery posts, and servo mounts
- Hardened steel drive shafts
- Ball bearing servo saver
- Adjustable front pivot dampening
- Composite side-links
- CNC Delrin 32DP main gear 60T

Technical Specs:

- Front Width: 248-254mm
- Rear Width: 262mm
- Wheelbase: 294mm
- Weight (Ready to Run): 2230g

Shown assembled, with equipment not included, for display purposes only.
