Description

This is the Hitec HS-965MG Coreless Ultra Speed
Standard size Servo with the
Universal Futaba J, Hitec S, JR and Airtronics Z Connector.
Suitable for high performance aircraft to 1/4 scale,
.30 size and larger helicopters and
1/10 and 1/8 scale on-and off-road vehicles.

FEATURES: Dual ball bearings
Coreless motor
Three metal gears and one metal-Karbonite gear
Water and dust resistant-not water proof
Indirect drive potentiometer for long life
Gold-plated contacts
MOS-FET motor drive

INCLUDES: One Hitec HS-965MG Metal Gear Ball Bearing Coreless Ultra Speed Servo with Universal connector, mounting hardware and instruction sheet

1.8" (45mm) diameter round servo horn

2.8" (71.5mm) double-sided servo arm

2.3" (59mm) double-sided servo arm

1.5" (39mm) single sided servo arm

1.3" (33mm) single sided servo arm

REQUIRES: Installing on model, attaching linkages, and connecting to receiver.

SPECS: Wire color codes: Black-Ground, Red-Power, Yellow-Signal

Operating speed: 0.13 sec @ 60° at 4.8V

Torque: 102.76 oz-in (7.4 kg-cm)

Weight: 2.18oz (62g) Length: 1.6" (40mm) Width: 0.78" (20mm) Height: 1.45" (37mm)

Wire length: 12" (305mm) approximate

COMMENTS: A note on Coreless motors: conventional servo motors have a steel core armature wrapped with wire that spins inside the magnets. In a Coreless design, the armature uses a thin wire mesh that forms a cup that spins around the outside of the magnet eliminating the heavy steel core. This design results in smoother operation and faster response time.
