Description

TIGER KING S-27 CC EVO ENGINE

Gizmomotors has teamed up with Tiger King to give you another innovation The S-27 evo engine.

This is by far the best quality engine you will see on the market.

This is a cast iron liner engine 35mm bore 28mm stroke In testing on the water we have seen well over 20,000 rpm's with tons of torque for those monster props.

It come's complete ready to run with all you see in pictures. It uses a std zenoah type collet and mounts.

Zenoah style flywheels will not work on this engine The TK engine flywheel is only 2 inchs in dia.

Engine comes with with full circle crank with rod on both ends cut or drilled for more oiling for the higher rpms

4 bearings installed from factory

Only the TK source coil will work on this engine.The TK coil is much longer then zenoah or other clone type coils.

Removable button head that we make shims for to lower or raise the squish.

Very simple replaceable liner These are not the thin liners you see in other engines that will warp in high speeds.

Any question please contact us.

Thanks Gizmomotors
