Description

FAZER MK2 Mercedes AMG GT3 Shipments of the 2020 model of the Mercedes AMG GT3 commenced in late 2019 and are expected to compete in major international races including the Japan Super GT. The distinctive powerful aero form of the GT machine is realized even in this 1/10 scale version.

The FAZER Mk2 Readyset was created for the pure enjoyment of R/C car driving. Now available as a chassis kit, owners have the flexibility to

add their own body and R/C system. Specifications have been elevated with optional parts such as HD TC center shaft S and TC universal swing shaft L to enhance the unrivaled symmetrical design and front-rear suspension balance of the lightweight chassis for R/C racers to enjoy. While the deckless design looks simple, a reduced number of components improves maintenance efficiency and optimizes torsional rigidity. Incorporation of nylon material further reduces weight and improves impact resistance. With its unique design, the FZ02 chassis embodies features and performance that will appeal to R/C drivers of all levels.

Body is sold clear. Shown painted for display purposes only.

Features:

- FAW203 universal swing shafts for front drive train
- New 40% preassembled kit format. Easy to build kit
- FAW209 Aluminum center shaft for precise power transfer and increased durability
