Description

Team Corally is proud to present their high-performance Formula 1 chassis, the FSX-10. The Corally design team started from scratch and questioned every detail from the ground-up. The FSX-10 features nicely machined first class carbon fiber, precision machined aluminum parts, and high strength composite plastic parts.

The engineering team focused on front-end adjustability, easy to adjust rear-end, and the overall flex dynamics of the car. They also made the car easy to understand and to adjust by cutting down unnecessary adjustment possibilities, meaning that drivers get on the track faster with the right settings.

Features:

- Precision cut 2.5mm carbon fiber chassis
- Precision cut 2.5mm carbon fiber front arms
- Adjustable front ride height

- Adjustable front camber - caster
- High strength composite plastics
- Easy to adjust rear ride height
- Torsion free 1-piece rear axle holder
- Precision grinded 7075 alloy rear axle
- Super smooth ball differential
- 7075 alloy rear wheel carriers
- Delrin CNC machined main gear
- 7075 alloy motor pod
- Adjustable rear wing
- Front bumper

Shown assembled, with equipment and parts not included, for display purposes only.
