### Description

When you have a need for insane, crazy speed, you need to take a look at the Python buggy! With up to 6S LiPo power and a 2050KV motor, you can utterly dominate the rest of the crowd with this super buggy. It's perfect for dirt jumps and skateparks - wherever you want to achieve air supremacy and incredible speeds!

With an ultra-durable, all-metal four-wheel drivetrain, fully independent suspension, race-inspired off-road chassis, and pro-level electronics, this is the ultimate basher truck for anyone looking for fun!

Capable of 2S-6S operation, the Python XP arrives completely assembled and ready to run. Simply add 4 AA transmitter batteries, and a suitable battery and charger for the ultimate in speed, performance, durability and handling.

For the complete story and all of the details on the Python XP, [CLICK HERE](#)

**Python Features:**

- Pre-built racing style monster truck with electronics, bodyshell and tires installed
- Team Corally TOROX 185 Amp ESC 2-6S with LiPo protection (programmable)
- Team Corally Kuron 2050kV 4-pole brushless motor 2-6S
- Varioprop CR-7220-MG High Torque Digital Servo, Metal Gear, 20 Kg Torque
- Aluminum servo arm
- Ergonomic Varioprop S2R transmitter, with interference-free 2.4GHz technology
- Separate splash-proof and dustproof electronic box with transponder mount
- Adjustable battery holder for all common LiPo batteries
- Full set of ball bearings, rubber sealed
- All transmission ball bearings are 8x16x5mm
- Hardened steel spur gear and motor pinion
- Three sealed metal differentials individually filled with silicone oil
- Quick + Easy diff access
- 2-piece aluminum motor holder with composite gear cover
- Complete metal drive train
- Steel front CVD joints
- Aluminum 17 mm drive hexes
- Oil-filled threaded 16 mm aluminum Big Bore shocks
- Shock spring perches locking system
- Aluminum shock towers, 5mm rear / 4mm front
- Independent Pivot Ball front suspension
- Independent double wishbone rear suspension
- Aluminum suspension mounts with composite cover
- Full set of machined steel turnbuckles with 7mm hexes
- Individually adjustable chassis and steering geometry
- Team Corally RSP anti-roll bar system, front + rear
- Aluminum chassis plate
- Reinforced chassis side guards with integrated body protection
- Front bumper with chassis protection
- Reinforced High Downforce Wing + Wing Holder
- Pre-glued high-speed low-profile tires on black 5-spoke nylon rims
- Sturdy, elaborately printed polycarbonate body
- Many tuning parts available for individual customization
- 110+ km/h (70+ mph) possible

### Specifications:

- Scale: 1/8 Scale
- Type: Electric Powered 4WD Racing Buggy RTR - 6S BrushlessPower
- Wheelbase: 326 mm
- Length: 497 mm
- Width: 305 mm
- Height: 175 mm
- Weight: 3350 g
- Transmission: 4WD Shaft Driven
- Motor Type: 2050kV 2-6S 4-pole brushless motor
- ESC Type: Waterproof 7.2 - 22.2 V brushless - programmable with LiPo cut off
- Servo Type: Digital - Metal Gear - 20 Kg Torque
- Max. Speed: 110+ km/h
- Required to complete: 4 x AA batteries, 2S-6S LiPo battery with XT90 connector, LiPo Charger
