Description

"Left 60 Over Crest, Slow into Sharp Hairpin Right..."

The GT24 Subaru WRC takes the 1/24th Micro Rally Car to a new level of performance and scale realism. With all its expertise in genre defining RC, Carisma has worked closely with Subaru to bring this officially licensed rally car to market.

WRC Meets Brushless Micro Perfection

Forget the blandly detailed offerings of other models in the industry; Carisma does things a little differently. With brushless power as standard, and sporting features like 2.4Ghz radio gear, a fast and responsive hobby grade steering servo, Rally Pin tires, and a fully ball bearing-equipped 4WD transmission, these cars not only look the part, they perform way beyond most perceptions of 1/24 Scale RC vehicles. Now you can create your own special stage in the living room or turn your backyard into a complete WRC championship. The size of these cars can mean only one thing...huge fun!

Features:

- KD PROPO CTX-2000 2.4GHz Transmitter
- MRS-24BL 2-in-1 RX/ESC (Brushless)
