Description

Expect more when you drive the Hunter BL SCT from DHK. Expect more reliability, more performance, more fun! DHK's 4WD Hunter BL SCT has the performance and brushless power to impress experienced drivers with an easy setup perfect for any skill level. The backbone of the Hunter BL SCT is the tough, double-deck chassis layout and competition suspension. This super stiff chassis and plush suspension is complimented by an advanced, tune-able, 3-differential four wheel drive (4X4) power train normally only reserved for 1/8th scale racers. These advanced differentials provide tune-ability (through the use of different differential oils) not found in other lesser RTR vehicles. Propulsion is a powerful brushless motor and ESC ready for any 2 cell LiPo battery or 6-7 cell NiMH battery pack. The Hunter BL SCT is loaded with even more superior design features from adjustable threaded shocks to its mid-motor design. Set the Hunter BL SCT for hard driving whether you're competing or bashing on any surface from asphalt to dirt. The Hunter BL SCT RTR is factory assembled and ready to use. Drive hard with the rugged, refined SCT design. Get out and win with the DHK Hunter BL SCT.

Items needed to complete:

- 2 cell LiPo or 6-7 cell NiMH battery pack
- Charger suited for battery
- - 4 AA batteries

Features:

- 2.4Ghz Radio system
- Brushless motor (3970kv)
- 50A waterproof ESC
- 4WD
- 35+ mph

Specifications:

- L - 22.0"
- W - 12.2"
- H - 7.68"
- Wheelbase - 13"
- Items Required for Completion: 2S LiPo battery and suitable charger; 4AA batteries for transmitter
-
