Description

Carisma M40S DTM models offer a unique combination of collectible-quality looks and race ready features to delight any enthusiast. The highly detailed, factory-decorated body shells deliver a level of appearance and scale fidelity rarely offered by performance-oriented R/C vehicles. The unique and innovative "hidden" body mount system eliminates unsightly posts and body clips, while the included LED light set with lenses and lamp buckets allows owners to add this finishing touch. These officially-licensed replicas are mated to a race-inspired chassis featuring an efficient four-wheel drive system, complete ball bearings, adjustable dampers, and more. The Carisma 2.4GHz radio system delivers rock-solid control of steering, throttle, brakes and even a reverse backup function while the included NiMH battery pack with charger means that there is nothing else to buy. Even AA batteries for the transmitter are included! For a scale race car model that is equally at home on a display shelf, desktop, or race track look no further than Carisma M40S DTM models.

Carisma M40S DTM features:

- Shaft driven 4-wheel drive
- 4-wheel independent double wishbone suspension design
- Oil filled shock absorbers
