Description

This is a special edition of the Grand Hauler. The R/C model assembly kit recreates a massive boxy, customized truck like those seen in North America. The special edition version is a great option for those without the time or confidence to apply a paint job to their kit, as the body, and other key body parts are pre-painted Metallic black (Tamiya Color TS-40). Additionally, a matte coating is applied over the metallic black which provides a cool look as seen in current trends in the automotive scene.

The model's ladder frame chassis features aluminum side channels with resin cross members and is equipped with a highly realistic suspension utilizing metal leaf springs and friction dampers. A front-mounted motor and 3-speed transmission power the two rear wheel axles, which are fitted with built-in differentials to enable smooth cornering.
