Description

The RC8B3.1 features new H.T.C. (High Torque Capacity) differentials with increased fluid capacity and a more consistent feel lap after lap. Precision CVA drive shafts are included front and rear to keep suspension travel free through the entire stroke, and power transfer is provided by an all-new, easy-to-maintain, 4-shoe clutch. The RC8B3.1 has been thoroughly revamped with all of the performance upgrades that led the AE Factory Team to a stand-out year in the 1:8 category, with multiple wins including a national championship!

NOTE:This vehicle needs extra parts to make it operational. Optional equipment shown, but not included. (Motor, exhaust, electronics, etc.)

Features:

- New 4-shoe clutch provides precise power transfer
- Optional Spring rates and clutch bells allow custom tuning
- 94mm CVA driveshafts increase traction and chassis support
- 16mm Big Bore 6061 aluminum shock bodies with bleeder style caps
- New shock springs (20mm I.D.)
- Hard-anodized 7075 aluminum chassis with keyed lower suspension plates
