Description

Reedy's WolfPack LiPo batteries have been a huge success thanks to their race-level quality, affordable price point, and wide variety of configurations. Now Reedy is proud to release the next generation of batteries that take the WolfPack philosophy to the next level. Thanks to increased capacities and generous discharge capabilities, overall power and top speeds are improved while extending run times far beyond what is capable with NiMH batteries or lower-quality LiPo batteries.

Each WolfPack Gen. 2 battery features Reedy's molded hard case for maximum crash protection in sizes that fit the most popular car configurations. Wires now exit the case through a rubber gasket which protects the wire's insulation while helping to prevent moisture from entering the case. High-quality cell manufacturing and construction techniques result in reliable operation and maximum cycle-life.

Reedy's WolfPack Gen. 2 LiPo batteries come equipped with beefy silicone wires and a reliable, low-resistance High Power T Plug connector. An integrated balancing harness with a XH connector is included.

Install the WolfPack today and let you your car howwwwl!

Features:

- Capacity: 4500mAh

- Configuration: Straight / 10 gauge
- Cont. Current: 35C
- Burst Current: 65C
- Wh: 50
- Dimensions (mm): 25.1x47x139
- Weight (g): 320.0
