Description

Reedy Zappers SG2 3600mAh 110C 7.6V LP Shorty Zappers SG2 batteries continue to utilize silicon-graphene construction but with an emphasis on reducing internal resistance and increasing cycle life. More power, improved durability, and high capacity provide world-class performance make Zappers SG2 the ultimate choice for 1:10 and 1:12 class racers.

Zappers SG2 batteries feature a 7.6 nominal voltage, meaning that with a suitable charger, the battery can be safely charged to 4.35V/cell. It is not a secret that more voltage equals more power, so there is no easier way to achieve a performance advantage than a higher charge voltage! However, even when the typical 8.40V (4.2V/cell) charging limit is enforced, Zappers SG2 still offers a significant advantage thanks to a flatter discharge curve, which results in more voltage deeper into the race.

Zappers SG2 batteries are available in low-profile (LP) stick and shorty versions as well as a 1S version designed for 1:12 and other classes that require 1S batteries. A high quality, durable hard case helps prevent damage while embedded socket connectors keep power-robbing resistance to a minimum. Male ESC connectors are included.

Features:

- Capacity: 3600mAh
- Voltage: 7.6V (2S)
- Max. Charge Rate: 7.2A
- Discharge Current: 110C
- Socket: 5mm

Specifications:

- Dimensions (mm): 92.8x46.5x18.3
- Weight (g): 155
