Description

Zappers SG3 batteries feature a 7.6 nominal voltage, which means that the battery can be safely charged to 4.35V/cell. It is not a secret that more voltage equals more power, so there is no easier way to increase power and top speed than a higher charge voltage! Even when the

typical 8.40V (4.2V/cell) charging limit is enforced, Zappers SG3 cells shine thanks to their inherently flat discharge curve, which results in higher voltage deeper into the race.

A high quality, durable hard case helps prevent damage while embedded socket connectors keep power-robbing resistance to a minimum. Male ESC connectors are included.

Features:

- State-of-the-art LiPo chemistry
- Reduced IR and weight
- Elevated average voltage
- Maximum durability and cycle-life
- Durable hard case with low-resistance connectors
- Built to ROAR/EFRA/BRCA/IFMAR specifications

Specifications:

- Capacity: 6000mAh
- Voltage: 7.6V (2S)
- Dimensions (mm): 139x47x22.5
- Max. Charge Rate: 12.0A
- Weight (g): 270
- Socket: 5mm
