Description

Zappers SG3 batteries feature a 7.6 nominal voltage, which means that the battery can be safely charged to 4.35V/cell. It is not a secret that more voltage equals more power, so there is no easier way to increase power and top speed than a higher charge voltage! Even when the typical 8.40V (4.2V/cell) charging limit is enforced, Zappers SG3 cells shine thanks to their inherently flat discharge curve, which results in higher voltage deeper into the race.

Zappers SG3 batteries are available in several configurations for a variety of on-road and off-road applications. A high quality, durable hard case helps prevent damage while embedded socket connectors keep power-robbing resistance to a minimum. Male ESC connectors are included.

Features:

- State-of-the-art LiPo chemistry
- Reduced IR and weight
- Elevated average voltage
- Maximum durability and cycle-life
- Durable hard case with low-resistance connectors
- Built to ROAR/EFRA/BRCA/IFMAR specifications

Specifications:

- Capacity: 9600mAh
- Voltage: 7.6V (2S)
- Dimensions (mm): 139x47x25.1
- Max. Charge Rate: 19.2A
- Weight (g): 335
- Socket: 5mm
