Description Reflex DB10 is a Ready-To-Run RC electric desert buggy based on the 9-time R.O.A.R. Short Course National Championship-winning truck. The Reflex DB10 is both all show and all go! It features some major upgrades not normally found in RTRs: a water-resistant high-power Reedy brushless speed control and 3300kV brushless motor, a 2.4GHz 2-channel radio system as well as a DVC (Dynamic Vehicle Control) receiver unit with built-in adjustable digital gyro which allows vehicle stability to be adjusted to flow with the terrain. A Reedy metal-gear digital high-torque servo and LED lights front and rear round out the Reflex DB10!

The suspension has an addition of adjustable blue anodized aluminum V2 12mm big bore coil-over shocks. The gearbox comes with a heavy-duty sealed-gear differential and externally adjustable V2 slipper clutch. 81mm CVA driveshafts increase traction and chassis support. Hex-drive, realistic off road wheels and tires, to keep the desert buggy gripping the ground, come standard on the Reflex DB10.

Features:

2.4GHz 2-channel radio w/ a DVC (Dynamic Vehicle Control) receiver featuring built-in adjustable gyro

High-torque, metal-gear Reedy servo with spring-style servo saver

Powerful Reedy 3300kV brushless motor

Water-resistant high-power Reedy brushless speed control with T-plug connector and LiPo low voltage cutoff

Factory-finished off road desert buggy body

Realistic Method Wheels with 12mm front and rear hex-drive nuts

Specifications:
Length: 481mm (18.94in)
Width: 282mm (11.1in)
Wheelbase: 322mm (12.68in)
Weight: 1855g (4.09lbs)
