Description

The RTR Coyote has all the features you would expect of a rig of this type. It's designed around a steel 'C' section ladder chassis, has a detailed 50's style truck body, and is designed to be the starting point for anyone wanting to get into this exciting and vibrant sector of RC at an affordable price. It's not a competition rig; it doesn't have any fancy gimmicks or technology, but it is a robust, well-designed and tested one-box solution. Just charge the pack and hit the trails. It really is as simple as that.

But looks can be deceiving: Underneath the understated shell is a full steel Universal Joint-equipped driveline with a locked-axle transmission to generate maximum traction from the slipper clutch protected gearbox, right through to the wheels and tires. A 35T brushed motor offers the perfect balance between torque and RPM, and true 4-link double triangulated link geometry is used to minimize axle steer. The high torque, axle mounted servo can be chassis mounted in the future if so desired, and the waterproof electronic speed control is programmable for both NiMH

and LiPo use, with a crawler mode set as its default which offers instant reverse and always-on drag brakes. The high grip 1.9" off-road tires are fitted to real beadlock wheels allowing the owner to fine tune the rig's weight bias for crawling by adding stick on wheel weights. For fun and trail-only use, the rig's stock setup is just perfect. The front bumper is winch-ready and the shell designed to accommodate an LED kit to add that extra touch of scale realism and allow night runs. Scale, Trail, Crawl. The SCA-1E is capable of all, and makes a great base for as detailed or as simple of a scale build as you want to undertake.

The Coyote recently completed an ultra-tough RECON G6 event (12-hour endurance test) to become officially "RECON G6 Certified"-proving its durability and performance.

Includes 7.2v, 1400mAH NiMH battery and USB Charger

**Specifications:**

Weight: Approx. 2200g

Skid Clearance: 75mm

Length: 480mm

Width: 230mm

Wheelbase: 280-305mm (adjustable)

Height: 210mm
